WORK HISTORY

Software Engineer - Part Time

2025 - PRESENT

Dema Africa, Kenya

- Led an agile team through the design, development, and deployment of a mobile web application, delivering a high-quality product on time and within budget.
- Engaged stakeholders and product owners using empathy maps, user stories, and journey maps to identify pain points, resulting in more user-centric product development and higher satisfaction.

Fullstack Software Developer - Contract

2024 - 2024

ConnectedHealth Life Pte, Singapore

- Designed a scalable database schema and built a RESTful API using NestJS, improving system performance and frontend-backend communication.
- Reviewed and refactored legacy codebase using SonarQube, reducing code smells by 25%, improving maintainability and scalability.

Web Developer - Full Time

2023 - 2024

Cyeco Africa, Kenya

- Optimized website's assets and SEO, boosting Lighthouse performance from 58 to 91, significantly improving visibility and usability.
- Collaborated with UI/UX designers to create intuitive interfaces, enhancing user engagement while maintaining design standards.
